Lewis Capaldi - Leave Me Slowly

```
                        tom:
              Bb

              Bb                        Gm
Two heartbeats, never in time
                    F
Two lovers over enemy lines
                                    Eb
I know we're broken, but don't wanna believe it

Bb                        Gm
You're so close to saying the words
                        F
Way past the point of any return
                              Eb
It's such a shame and I don't wanna believe it

      Bb
Oh, if I could go back to that evening we met
        Gm
Trembling hands as I'd ask for your number again
      F
You saw me different then
      Eb
Oh, when I held your heart in my hand

      Bb                  Gm
So, if you're gonna leave me
                      F
Just leave me slowly

Let's make it last
            Eb
Just one more dance
                        Bb
Before the moment's passed
                      Gm
I'd rather that you lay here
            F
Than leave me lonely

So, stay for a while
              Eb
Just one more mile
                  Bb
Before we say goodbye

                        Gm
Two shadows of the people we were
                      F
So close to finding heaven on earth
                              Eb
It's such a shame and I don't wanna believe it

      Bb
Oh, if I could go back to that evening we met
        Gm
Trembling hands as I'd ask for your number again
      F
You saw me different then
      Eb
Oh, when I held your heart in my hand

      Bb                  Gm
```
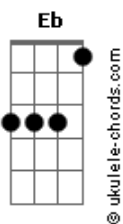

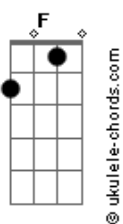

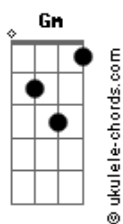

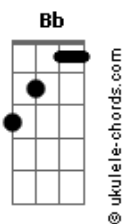

```
So, if you're gonna leave me
                      F
Just leave me slowly

Let's make it last
            Eb
Just one more dance
                        Bb
Before the moment's passed
                      Gm
I'd rather that you lay here
            F
Than leave me lonely
So, stay for a while
              Eb
Just one more mile
                  Bb
Before we say goodbye

(  Bb   Gm   F   Bb  )
                    Bb
Oh, I'd kill to go back to that evening we met
              Gm
Trembling hands as I'd ask for your number again
            F
You saw me different then
            Eb
Oh, when I held your heart in my hand

        Bb                  Gm
So, if you're gonna leave me

Just leave me slowly

(If you're gonna leave)
      Bb              Gm
So, baby, if you leave me

(Leave me slowly) Just leave me slowly

Let's make it last
              Eb
Just one more dance
                          Bb
Before the moment's passed
                        Gm
I'd rather that you lay here
                  F
Than leave me lonely

So, stay for a while
                Eb
Just one more mile
                      Bb
Before we say goodbye

(If you're gonna leave, leave me slowly)

F
Stay for a while
                Eb
Just one more mile
                      Bb
Before we say goodbye
```
