

## Lewis Capaldi - Rush (feat. Jessie Reyez)

```
I know we tried to hold on
 (forma dos acordes no tom de G )
                                                                But where do you go
Capostraste na 6ª casa
                                                                When love, it just ain't enough?
            [Verso 1]
                                                                Now does it kill you when you think about me?
The space between where our ends meet
                                                                Are you as close to giving up as I've been?
Has grown too much for me to block it out
                                                                I know we kept losing touch
I miss the tone of your heartbeat
                                                                Got lost in the rush
                                                                I pray you don't hurt too much
It's such a warming and familiar sound
                    D
I hope you're finding the power
                                                                [Ponte]
To help you make it through the darker days
                                                                Well, we had it all
For now, I wait by the hour
                                                                And we let it fall
If you wanna take somebody's breath away
                                                                But I hope you find whatever you are looking for
[Refrão]
                                                                Well, we had it all
I hope you're lonely, hope you're lost 'cause I've been
                                                                And we let it fall
And I'd hate to think you're better off without me
                                                                Lost in the rush
I know we tried to hold on
                                                                But I pray you don't hurt too much
But where do you go
When love, it just ain't enough?
                                                                I hope you're lonely, hope you're lost 'cause I've been
Now does it kill you when you think about me?
                                                                And I'd hate to think you're better off without me
Are you as close to giving up as I've been?
                                                                I know we tried to hold on
I know we kept losing touch
                                                                But where do you go
Got lost in the rush
                                                                When love, it just ain't enough?
I pray you don't hurt too much
                                                                Now does it kill you when you think about me?
[Verso 2]
                                                                Are you as close to giving up as I've been?
I don't come close to an angel
                                                                I know we kept losing touch
You ain't never been no kind of saint
                                                                Got lost in the rush
But when we both came together
                                                                I pray you don't hurt too much
Hell to heaven, you were my escape
                                                                [Ponte]
But fires don't burn forever
                                                                Well, we had it all
And all these ashes crumble when we touch
                                                                And we let it fall
We danced to death in the fire
                                                                But I hope you find whatever you are looking for
What can we do now the music's done, my love?
                                                                Well, we had it all
[Refrão]
                                                                And we let it fall
I hope you're lonely, hope you're lost 'cause I've been
                                                                Lost in the rush
And I'd hate to think you're better off without me
                                                                But I pray you don't hurt too much
```
