Loving you is like a fairytale
I just can't pick up the phone again
This time I'll be on my own, my friend
One more time, I'm all alone again

Em **C**
Sex with you is like I'm dreaming, and
G
I just wanna hear you scream again
Em **C**
Now you're gone, I can't believe it
G
Time I spent with you deceiving me

Em **C**
I don't care if you believe in me
G
I still wonder why you're leaving me
Em **C**
I don't care if you believe me
G
I still wonder why you tease me

(Riff)
And if I'm taking this the wrong way
I hope you know that you can tell me whatever you're thinking
It's when you put me in the spotlight (spotlight)
I hope you know I'm faded, all of this liquor I'm drinking

Em **C**
And if I'm taking this the wrong way (wrong way)
G
I hope you know that you can tell me whatever you're thinking
Em **C**
It's when you put me in the spotlight (spotlight)
G
It's when you put me in the spotlight (spotlight)

(Riff)
When the moon hit your skin
I could see you and him
Not you and me, yeah

But it's just you and me, yeah
When the sun shines above
You wake up with the one you love
Not you and me, yeah
But it's just you and me, yeah
(All alone again)
