

Lily Allen - Who'd Have Known

```
Tom: F
                                                               And today you accidentally... called me baby
   (verse 1) (0:00)
                                                               (chorus) (1:39)
It's five o'clock in the morning
                                                               Are you mine? are you mine?
                                                                          Am
                  Am
Conversation got boring
                                                               Cause i stay here all the time
                             Gm7
                                                                                            Gm Am Bb F
You said you were going to bed soon
                                                               Watching telly, drinking wine
                                                                           Am
So i snuck off to your bedroom
                                                               Who'd have known? who'd have known?
                                                               When you flash up on my phone
And i thought i'd just wait there
Until i heard you come up the stairs
                                                               I no longer feel alone
                     Gm7
                                                               (bridge) (2:01)
And i pretended i was sleepin
Gm7sus4
And i was hoping you would creep in... with me
                                                               Let's just stay, let's just stay
(verse 2) (0:23)
                                                                          Am
                                                               I wanna lie in bed all day
                                                                                           Gm Am Bb F
You put your arm around my shoulder
                                                               We'll be laughing all the way
                          Gm7
                                                                             Am
And it was if the room got colder
                                                               Told your friends, they all know
And we moved closer in together
                                                               We exist but we're taking it slow
We started talkin bout the weather
                                                               Let's just see how it goes
                                                                                  Bb Am Gm Bb F
                     Αm
You said tomorrow would be fun
                                                               Let's see how it goes
And we could watch "a place in the sun"
                                                               (break) (2:29)
I didn't know where this was going... when you kissed me
                                                               ( F Am Gm7 Bb )
                                                                ( F Am Gm7sus4 Bb )
(chorus) (0:46)
                                                               (chorus) (2:52)
Are you mine? are you mine?
                                                                         Αm
                                                               Are you mine? are you mine?
          Am
Cause i stay here all the time
                                                                          Am
                            Gm Am Bb F
                                                               Cause i stay here all the time
Watching telly, drinking wine
                                                                                            Gm Am Bb F
                                                               Watching telly, drinking wine
           Am
Who'd have known? who'd have known?
                                                               Who'd have known? who'd have known?
When you flash up on my phone
                                                               When you flash up on my phone
               Gm
I no longer feel alone
                                                                                   Gm Am Bb F
                                                               I no longer feel alone
                 Bb Am Gm Bb F
No longer feel alone...
                                                               (bridge) (3:15)
(verse 3)(1:15)
                                                               Let's just stay, let's just stay
I haven't left you for days now
                                                               I wanna lie in bed all day
And i'm becoming amazed how
                                                                                           Gm Am Bb F
                                                               We'll be laughing all the way
You're quite affectionate in public
                                                               Told your friends, they all know
In fact your friend said it made her feel sick
                                                               We exist but we're taking it slow
And even though it's moving forward
                                                               Let's just see how it goes
There's just the right amount of awkward
                                                                                  Bb Am Gm Bb F
                                                               Let's see how it goes
