Lorde - California

```
                tom:
                A
               D
Once upon a time in Hollywood
      A
When Carole called my name
        D
I stood up, the room exploded, and I
A                   E              D
Knew that?s it, I'll never be the same
                                  A
That's when?the doors swung open
                                 E
And the voice said: We're glad you came
               D
Now I've spent thousands on you, darling
        A                          D
Oh, the hotels and the jets and I'd pay it all again
              A          E              D
To have your golden body back in my bed
                              A                              E
But I don't miss the poison arrows aimed directly at my head

[Pre-chorus]
          D                A
Goodbye to all the bottles, all the models
Bm                                          E
Bye to the clouds in the skies that all hold no rain

[Chorus]
                             D
Don't want that California love
                Gbm        D
Don't want that California love
                 A     E    (D )
Don't want that California love

[Verse 2]
          D
Oh, once upon a time the Canyon store
     A
Was where my world began
          D                                  A                  E
All that mystery and beauty gleaned from desert flowers and
gifted children
D                          A                                    E
But it got hard to grow up with your cool hand around my neck
          D             A
Now in my hometown, sunbathing
        D               A
My girlfriends and my baby
 E            D
But every time I smell tequila
                         E
The garden grows up in my mind again

[Pre-chorus]
            D               A
Goodbye to all the bottles, all the models
Bm                                  E
Bye to the kids in the lines for the new Supreme

[Chorus]
                             D
Don't want that California love
                Gbm          D
Don't want that California love
                A    E       D
Don't want that California love
                Gbm          D
Don't want that California love
                A    E       D
Don't want that California love
                Gbm          D
Don't want that California love

[Outro]
A   E              D
(Hmm) It's just a dream
A   E              D
(Hmm) It's just a dream
A   E              D
(Hmm) Said it's just a dream
A   E              D              A E
(Hmm) I wanna wake up, I wanna wake up
