

## **Luke Bryan - Roller Coaster**

```
Tom: Ab
                                                                Turned into long crazy nights
                                                                        Em7
                                                               When the music got loud
 (forma dos acordes no tom de G )
Capostraste na 1ª casa
                                                               We'd sneak away from the crowd under the boardwalk lights
Intro: G D Em7 C
[Parte 1 de 4]
                                                                And with all the things we said
                                                               What I just can't get past
[Parte 2 de 4]
                                                                Is the way we let it end
                                                               Now I'm wondering where she is
                                                                Knowing I can't get that goodbye back
[Parte 3 de 4]
                                                                And we spent that week wide open
                                                                Upside down beside the ocean
[Parte 4 de 4]
                                                                I didn't know where it was going
                                                               Just trying to keep my heart on the tracks
She had a cross around her neck
                                                                I should've known that kind of feeling
                                                                Would last longer than that week did
And a flower in her hand
        Fm7
                                                                      Fm7
That I picked from the side of Thomas Drive
                                                               Blown away and barely breathing
On our way to the sand
                                                                Sunday came and it was over
          G
We found an old wooden chair
                                                               Now she's got me twisted
Still warm from the sun
                                                                Like an old beach roller coaster
Pushed it back, gave me a kiss
                                                               She's like a song playing over and over
with Bacardi on her lips and I was done
                                                                In my mind, where I still hold her
                                                                I had the chance and I should've told her
And we spent that week wide open
Upside down beside the ocean
                                                                And we spent that week wide open
I didn't know where it was going
                                                               Upside down beside the ocean
         С
Just trying to keep my heart on the tracks
                                                                         Fm7
                                                                I didn't know where it was going
I should've known that kind of feeling
                                                                Just trying to keep my heart on the tracks
Would last longer than that week did
                                                                I should've known that kind of feeling
      Fm7
Blown away and barely breathing
                                                                Would last longer than that week did
Sunday came and it was over
                                                                Blown away and barely breathing
Now she's got me twisted
                                                                Sunday came and it was over
Like an old beach roller coaster
                                                                Now she's got me twisted, yeah, I'm still twisted
( G )
                                                               Like that old beach roller coaster
The rest of those days
                                                                   Like that old beach roller coaster
```
