                C
          F          G                    Am
Erased by amorphous feelings
As it shrinks my lungs
 F                    G
Lost in a storm of thoughts
     Am
While it screams I?m never enough

 F                 G       Am
How can I be brave if I cry all the time
                  F
While humans autolyze
                  G                       Am
I feel inside earthquakes and fires
                F      G  Am
An evergreen solitude, endless fear
F           G           Am
  I won?t find a cure in the sea

   F
Slipping through my eyes
            Am                  G
There is a lot I can't hide

   F Dm Am                  G
It all,            The sun howls it all
 F Dm Am                   G
It all,            The sun howls it all
(Em   F )

                      F     G
And I can feel the heat
                  Am
I barely can stand on my feet
                     F                 G
Left aside by my own strength
                    Am
I fight for the existence

             F                 G
There is a lot of pain and rage
 Am
Ripping everything to leave
                F               G
Holding on at any kind of solace
           Am
I'm still alive, I'll be free

  F
Slipping through my eyes
            Am                  G
There is a lot I can't hide

     F     Dm        Am

The fever is consuming
