

Marshmello - Be Kind (feat. Halsey)

```
I know you're chokin' on your fears
                            tom:
                B (forma dos acordes no tom de G )
                                                                  Already told you I'm right here
Capostraste na 4º casa
                                                                  I will stay by your side every night
            [Primeira Parte]
                                                                [Refrão]
 Wanna believe, wanna believe
                                                                I don't know why you hide from the one
  That you don't have a bad bone in your body
                                                                               Cadd9
                                                                You close your eyes to the one
But the bruises on your ego make you go wild, wild, wild, yeah
                                                                Mess up and lie to the one that you love
 Wanna believe, wanna believe
Cadd9
                                                                When you know you can cry to the one
 That even when you're stone cold, you're sorry
                                                                         Cadd9
                                                                Always confide in the one
Tell me why you gotta be so out of your mind, yeah
                                                                You can be kind to the one that you love
[Pré-Refrão]
                                                                Ah-ah-ah-ah-ah-aaaah
  I know you're chokin' on your fears
                                                                [Ponte]
 Already told you I'm right here
                                                                  I know it's hard for you, but it's not fair
 I will stay by your side every night
                                                                Going sick in the head, tryna get you there
[Refrão]
                                                                 And I know it's hard for you, but it's not fair
I don't know why you hide from the one
                                                                It's not fair, it's not fair
You close your eyes to the one
                                                                [Refrão]
Mess up and lie to the one that you love
                                                                I don't know why you hide from the one
When you know you can cry to the one
                                                                               Cadd9
                                                                You close your eyes to the one
         Cadd9
Always confide in the one
                                                                Mess up and lie to the one that you love
You can be kind to the one that you love
                                                                When you know you can cry to the one
Ah-ah-ah-ah-ah
                                                                          Cadd9
                                                                Always confide in the one
[Segunda Parte]
                                                                You can be kind to the one that you love
I know you need, I know you need
                                                                Ah-ah-ah-ah-ah-aaaah,
 The upper hand even when we aren't fighting
                                                                Cadd9
                                                                  Ah, ah-ah-ah-ah-ah-aaaah, ah
'Cause in the past, you had to prepare every time, yeah
                                                                When you know you can cry to the one
 Don't wanna leave, don't wanna leave
                                                                         Cadd9
 But if you're gonna fight, then do it for me
                                                                Always confide in the one
I know you're built to love, but broken now, so just try
                                                                You can be kind to the one that you love
[Pré-Refrão]
                                                                  Ah-ah-ah-ah-ah-aaaah
Acordes
                                                                                     Cadd9
