                                                                                                                                                                                                                                                                                                                                                                                                                                       Am
And everything keeps moving on, moving on
                                                                                                                                                                                                                                                                                                          Cause there is a light in your eyes, in your eyes
Hold on, hold tight
                                                                                                                                                                                                                                                                                                          Cause there is a light in your eyes, in your eyes
                                                                                                                                                                                                                                                                                                                                                                                                                                     Am
                                                                                                                                                                                                                                                                                                          Cause there is a light in your eyes, in your eyes
Make it through another night
In every day there comes a song with the dawn
                                                                                                                                                                                                                                                                                                          Cause there is a light in your eyes, in your eyes
