Matt Simons - When The Lights Go Down

Tom: D

```
                Bm              A              G          D
When I wake in the night I'm reaching for you
                Bm              A          G          D
There's a place in my dreams where you're still in the room
         G          A     Bm
And you're next to me somehow

                Bm              A          G          D
There are times when I sleep on your side of the bed
                Bm          A          G          D
Now since you've been away it's as close as I get
         G          A     Bm
Oh well, I should've learned by now

G
Morning light

                                    A
Every now and then I start to feel alright
   A          Bm              G
Days are going by, I know I'll heal in time
     G              D          A
Never thought I'd be scared of the dark

                                G
Now I only feel it when the lights go down
                    Bm          A
Feel it when the lights go down
                                    G
Only get that feeling when the night rolls around
                    Bm          A
Feel it when the night rolls around

         Bm          A          G          D
There are times I get drunk when I'm all by myself
         Bm          A          G          D
Cause it helps me forget you're with somebody else
         G          A     Bm
Well, it don't really work that well

      Bm          A          G          D
And the other night I walked by your place
      Bm          A          G          D
Hoping by chance that I might see your face
               G          A     Bm
Oh now why did I think that would help

G
Morning light

                                    A
Every now and then I start to feel alright
   A          Bm              G
Days are going by, I know I'll heal in time
     G              D          A
Never thought I'd be scared of the dark
```

```
                                G
Now I only feel it when the lights go down
                    Bm          A
Feel it when the lights go down
                                    G
Only get that feeling when the night rolls around
                    Bm          A
Feel it when the night rolls around

                                G
Oh I only feel it when the lights go down
                    Bm          A
Feel it when the lights go down
                                    G
Only get that feeling when the night rolls around
                    Bm          A
Feel it when the night rolls around

   G
I'll pray for light

                                    A
Four in the morning I don't feel alright
        A          Bm              G
Nights are growing long, I hope I heal in time
        G          D          A
Never thought I'd be scared of the dark

                                G
Now I only feel it when the lights go down
                    Bm          A
Feel it when the lights go down
                                    G
Only get that feeling when the night rolls around
                    Bm          A
Feel it when the night rolls around

                                G
Oh I only feel it when the lights go down
                    Bm          A
Feel it when the lights go down
                                    G
Only get that feeling when the night rolls around
                    Bm          A
Feel it when the night rolls around

                                G
Oh I only feel it when the lights go down
                    Bm          A
Feel it when the lights go down
                                    G
Only get that feeling when the night rolls around
                    Bm          A
Feel it when the night rolls around

         Bm          A          G          D
When I wake in the night I'm reaching for you
```
