

McKenna Grace - Autumn Leaves

tom:
G

Met in spring, fell in fall

Rainy days, winter walks

I wear your shirt, all night we talk

In your arms is my favorite spot

Plane tickets, bucket lists

Polaroids and our first kiss

Now I know that love exists

And movie nights and promises

The way you look at me

Face only lit by the TV

The prettiest eyes I've ever seen

Blue light shining like a dream

Oh

B

My favorite songs all appeared

To speak of love but now they mean

Something else since you're with me

I'm falling down like autumn leaves

My favorite smile's 2000 miles away

But now I'm flying east

I'll leave my kiss on your cheek

I'm fallin' down like autumn leaves

Oh, oh, ah-oooh

New York city in early may

Nothing ever stays the same

Come October things have changed

Now there's a heart next to your name

Crowded room, I look for you

I'm at this party cause you're here too

We'll leave early, 11:30

I watch you shine like you're the Moon

The way you look at me
