

Metric - The Shade

Tom: E

(com acordes na forma de Capostrate na 2ª casa D)

I'm following the sun

That's setting in the West

We're floating on a bed of fading lights

A canopy of trees

Bears witness to the breeze

I'm falling like a feather, soft and light

Baby, there's no better time

No better time, baby, we can't find

With eternal love, the stars above

All there is and ever was

I want it all, I want it all

I want it all, I want it all

A blade of grass, a grain of sand

The moonlit sea, to hold your hand

I want it all, I want it all

I want it all, I want it all

The embers of a fire

still burning as they die

Stay bright to keep us side by side

Baby, there's no better time

No better time, baby, we can't find

With eternal love, the stars above

All there is and ever was

I want it all, I want it all

I want it all, I want it all

A blade of grass, a grain of sand

The moonlit sea, to hold your hand

I want it all, I want it all

I want it all, I want it all

With eternal love, the stars above
