

Miley Cyrus - Rockstar

```
Tom: G
                                                                Guess you don't need me
                                                                                                                     Am
                                                                Why you're not seein' what you're missin'
Sometimes I walk a little faster
                                                                On the outside shyin' away
In the school hallway
                                                                On the inside dyin' to say
Just to get next to you
Some days I spend a little extra
                                                                Im unusual
Time in the morning
                                                                Not so typical
                                                                Way too smart to be waiting around
Dress to impress you
Guess you dont notice
                                                                Tai chi practices
Guess you dont need this
                                                                Snowboard champion
                                                   Am
                                                                                                       Am
Sad you're not seein what you're missin'
                                                                I could fix the flat on your car
On the outside shyin away
                                                                I might even be a rock star
On the inside dyin to say
                                                                I might even be a rock star
Im unusual
                                                                If you only knew the real me
Not so typical
                                                                I might even be a rock star
                                             Am
                                                                                                                 \mathsf{Am}
Way too smart to be waiting around
                                                                I'm telling you that we are meant to be
Tai chi practices
                                                                Now wouldn't it be nice if you could see
Snowboard champion
                                                                That I really am a rock star
I could fix the flat on your car
                                                                Im unusual
I might even be a rock star
                                                                Not so typical
I might even be a rock star
                                                                Way too smart to be waiting around
Sometimes I wish when the phone rings
                                                                Tai chi practices
That it would be you
                                                                Snowboard champion
Saying let's hang out
                                                                                                       Am
                                                                I could fix the flat on your car
Then you confess
                                                                I might even be a rock star
That there's something special between us
                                                                I might even be a rock star
Why don't we find out
                                                                Cuz i'm really a rock star
But you don't know me
                                                                Cuz i'm really a rock star
Acordes
```
