

## Mø - Don't Leave

```
Shut your mind off and let your heart breathe
 (com acordes na forma de G )
                                                                You don't need to be worried
Capostraste na 1ª casa
You know me; now and then, I'm a mess
                                                                I may not ever get my shit together
                                                                                       Em
Please don't hold that against me
                                                                But ain't nobody gonna love you better
I'm a girl with a temper and heat
                                                                Don't go
I know I can be crazy
                                                                What we have here is irreplaceable
                                                                No, I won't trade this for nothing
But I'm not just a fuck-up, I'm the fuck-up you need
                                                                I may not ever get my shit together
I don't hear nobody when you focus on me
                                                                                       Em
                                                                But ain't nobody gonna love you better
Perfectly imperfect, yeah, I hope that you see
Tell me you see
                                                                Sitting in the living room
'Cause I know that you've been thinkin' 'bout it
                                                                You look at me, I stare at you
                                                                See the dark, but seen the love
Shut your mind off and let your heart breathe
                                                                I have and it is all for you
You don't need to be worried
                                                                Let me wrap myself around you, baby
I may not ever get my shit together
                                                                Let me tell you you are everything; you are
                       Fm
But ain't nobody gonna love you better
                                                                Losing my words, I don't know where to start, but baby
                                                                Don't leave me
                                                                Shut your mind off and let your heart hear me
What we have here is irreplaceable
No, I won't trade this for nothing
                                                                I won't trade this for nothing
I may not ever get my shit together
                                                                I may not ever get my shit together
                       Fm
But ain't nobody gonna love you better than me, yeah
                                                                But ain't nobody gonna love you better
Love you better than me (oh, whoa-oh)
                                                                Don't leave
                                                                Shut your mind off and let your heart breathe
In a room full of people
With you, I don't see anybody else, no
                                                                You don't need to be worried
When we fight, and you're right
                                                                I may not ever get my shit together
So surreal, I make a kiss so difficult
                                                                But ain't nobody gonna love you better (There ain't nobody
                                                                gonna love you better than me)
But I'm not just a fuck-up, I'm the fuck-up you love
                                                                Don't go
We ain't like nobody else, tell me so what
                                                                What we have here is irreplaceable
Perfectly imperfect, yeah, baby, that's us
                                                                No, I won't trade this for nothing
Baby, that's us
                                                                I may not ever get my shit together
'Cause I know that you've been thinkin' 'bout it
                                                                                       Em
                                                                But ain't nobody gonna love you better than me
Don't leave
                                                                Yeah, Love you better than me
Acordes
      AЬ
                   G
                                 En
                                                                                ukulele-chords.com
