

# Neil Young - Crime In The City

Tom: **Gb**

This is my first tab that I did by ear so yeah...

The whole song is pretty distorted so put your "gain" & "distortion" all the way up.  
the tabs I found had the opening played with messed up chords that all sounded terrible, I tabbed it so listeners can identify it.

~ = let it ring a little

b = bend

h = hammer on

p = pull off

Intro: Listen to the song to get the pattern, it really just sounds like messy picking, but well with the distortion.

Verse

Similar to Intro

0:42 "His best friend was a robber"

0:57 "The bungalow was surrounded"

Picking part again...

1:26 ... Strum The **A** Chord... (Strum open strings twice in the middle...listen to the song to hear it.)

**A**

1:32

( I'm not going to tab the solo because I suck at solos and it will take longer than 5 minutes :P )

Keep Repeating all of this Stuff as it is in the song...

Then...around 3:50

4:18

Yup that's all Im going to do...  
So listen to the song, learn it, and play it...this song requires a lot of modifications the amp for the right sound...  
Keep on Rockin in the Free World
