

Neil Young - Mr. Desappointment

```
Intro: G (long sustain) C / / / Am / C /
                                                                 Let's say I got a habit
Let's say it's hard to break
G / / Bm / / / C / / Am / C /
                                                                  Let's say we got to do something
                                                                  Before it's just too late.
G / / Bm / / / C / / Am / Em /
                                                                 I want to get you back
                                                                  I don't know how to do that
Verse:
                                                                  I miss you loving me
                                                                  The way you used to.
Where did all the feelings go?
                                                                 I'm taking the blame myself
For livin' my life in a shell
What about that happy glow?
                                                                  And now I'm breakin' out
Was that so long ago,
                                                                  But will you still be there.
Am
When we were first in love?
                                                                  Let's say that love is blind
                                                                 Let's say that time is kind
                                                                  Let's say that it's not over
I didn't feel the change,
                                                                  'Til it's over.
Everything was still the same.
                                                                  Chorus:
                                                                  I'd like to shake your hand, Disappointment
And when that moment came,
                                                                  Looks like you win again, but this time might be the last.
I didn't know.
                                                                  Instrumental: (over Verse chords)
                                                                 \mathsf{G} / / \mathsf{Bm} / / \mathsf{C} / / \mathsf{Am} / \mathsf{C} /
Verse:
I miss the feeling,
                                                                 G / / / Bm / / / C / / / Am / Em /
I miss the light,
                                                                 But I got faith in something,
I'll never give up the fight.
Why's it so heavy,
                                                                  Verse:
This love of mine?
                                                                  I'm savin' the best for last
I lost the feeling,
                                                                  Let's leave this all in the past
I lost the time.
                                                                  The beauty of loving you
                                                                  Is what we've both been through
Chorus:
                       Bm
                                                                  So now it's up to me
I'd like to shake your hand, Disappointment
                                                                 To set your spirit free
                                                       C Am Em So you can swing again
                     G
                                   Bm
Looks like you win again, but this time might be the last.
                                                                 On our gate
Instrumental: (over Verse chords)
G / / / Bm / / / C / / / Am / C /
                                                                  I'd like to shake your hand, Disappointment
                                                                  Looks like you win again, but this time might be the last.
G / / Bm / / / C / / Am / Em /
                                                                  (End on G)
```
