```
      C
You say we're both little people and you like it that way
  Am
But in time I'm gunna put this body to shame (and grow old)
  F
Where a suit like my old man
  G
Pack up all my things and get my ass out of town

                     C
We've got it good
                       Am
Whether you like this town or not

I know it's small but with a big head
                         F
it's bound to get hot

In the summer

But the summer is a bummer
    G
If you can't leave
                         Am
This pathetic excuse for a town

   F
That holds all your memories
   C
A lifetime of crushes and your broken dreams
  D
To be anywhere but here
  G
But baby anywhere is away from me

   C              Am
If you got it all figured out
                         F
Then what is there to shout about
         G
This midwest town is gunna miss you
   C            Am
Just go ahead and work it out
                       F
But first come on and let it out
  G
Scream it shout tell everbody that your gunna leave

   C
In about one year you'll have it all figured out
  Am
These big city dream are what you're about
```
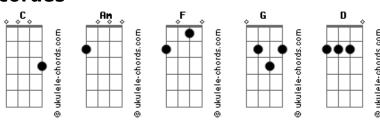

```
  F
Walking like stangers among these states
  G
Only time will tell how long I can wait

                  C
We've got it good
                        Am
Whether you like this town or not

I know it's small but with a big head
                       F

   F            C
Me again oh so casually
                  D                 G
Did you take the hit for me or the home team
   C              Am
If you got it all figured out
                         F
Then what is there to shout about
