

# Niall Horan - Science

tom:  
Capo: Bb (forma dos acordes no tom de G)  
Intro: C Am G D

[Primeira Parte]

Can you feel what's beneath?  
Is it stone cold under your feet?  
Are you numb? Can you touch?  
Is the silence a little too much?

[Pré-Refrão]

And all you wanna do is break out

[Refrão]

So, when you feel there's nothin' left  
Oh, there's still a heart beatin' in your chest  
And when you're runnin' from the flood  
Oh, you've got nowhere left to run

It's just science  
Don't let it break you down

[Segunda Parte]

You can dance on your own  
It's okay 'cause you're not alone

You can hide your love  
You'll have your days in the Sun

[Pré-Refrão]

But all you wanna do is break out

[Refrão]

So, when you feel there's nothin' left  
Oh, there's still a heart beatin' in your chest  
And when you're runnin' from the flood  
Oh, you've got nowhere left to run

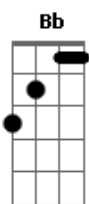

[Ponte]

Oh, when you feel you're sinkin'  
Overthinkin', time is crashin' down  
Oh, if you need somebody  
The world's too heavy to shine  
It's not too late now

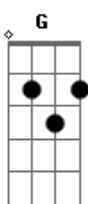

[Final]

It's just science (don't let it break you)  
Don't let it break you down (don't let it break you down)  
Mm, it's just science (don't let it scare you)  
Don't let it scare you now
