

Nick Jonas - Anywhere

Tom: Ab

Intro: C D G C Am

What's better than the time being?

Dark skies never scare me

Fallin', I'll be right behind ya

It's still me, like the very first time

Somethin' had to be this hard

Somethin' that I really want you

Somethin' had to be this far

Somethin' that I really wanted

You could be anywhere right now

It ain't hard to see

I'll be your light

If you say the words for me

You could be anywhere right now

It ain't hard to see

I'll be your light

If you say the words for me

Because I've loved you, yeah

It's not important any longer to me

What are we even fightin' over? Yeah, yeah

It's not important any longer to me

What's better than the time being?

Dark skies never scare me

Fallin', I'll be right behind ya

It's still me, like the very first time

Somethin' had to be this hard

Somethin' that I really want you

Somethin' had to be this far

Somethin' that I really wanted

You could be anywhere right now

It ain't hard to see

I'll be your light

If you say the words for me

You could be anywhere right now

It ain't hard to see

I'll be your light

If you say the words for me

I don't know what to do if you're not right beside me

I had to move, but, baby, you know where to find me

You could be anywhere right now

It ain't hard to see

I'll be your light

If you say the words for me

You could be anywhere right now

It ain't hard to see

I'll be your light

If you say the words for me

(Repeat till fade)

Anywhere right now

It ain't hard to see

I'll be your light

If you say the words for me

Acordes
