

# Nickelback - Good Times Gone

Tom: **G**

Intro: riff:

This riff just keeps repeating itself

Then the chorus comes in at about 1:25 or so:

Where the good times gone?

Where the good times gone?

Play that part twice.

All that stupid fun

All that shit we done

Play this part twice

Where the good times gone?

Well I still don't know.

Play this only once this time

This brings us to about 1:52 or so. The chords in the next section are a simple pattern of G, F, Bb, and C. I like to play them all as power chords and slide from one to another, but that's my preference.

The next section begins at about 2:04.

This is just the opening riff played over the G, F, Bb, **C** progression.

The next section begins at about 2:29

You can bribe the devil, you can pray to God. You can sell off every..

The rest of the song is just repeating what's already tabbed out for you.

Enjoy.
