

Nina Nesbitt - Last December

tom:
Capostrate na 4ª casa

C
You were different to anyone i've ever known
G
Used to have a tendency to drink alone
Am
But when i met you i felt like i wanted
F
To save you somehow

C
I loved the way that you always put me first
G
You gave me your best and i gave you my worst
Am
Took it for granted because i couldn't see
F
Why you'd let me in just to get hurt

G **C** **F**
But moments stay when people leave
G **C** **F**
And i can say that i still remember when

C
I met you there with a nervous smile
G
And i left knowing you'd be here a while
Am
I loved last december

F
Don't think that i don't remember it all now
C
Drinking mulled wine and seeing the lights
G
You lit up london in my eyes
Am
I loved last december
F
Don't think that i don't remember it all know

C
We sat in the graveyard, talking about life
G
Drove for days and played under different lights
Am
Then we'd run off, with enough love to
F
Keep us up for nights

C
You were the safety blanket i needed most
G
But you were always so anxious

Am
Of my ghosts that came at night
F
From my past life

G **C** **F**
But moments stay when people leave
G **C** **F**
And i can say that i still remember when

C
I met you there with a nervous smile
G
And i left knowing you'd be here a while
Am
I loved last december

F
Don't think that i don't remember it all now
C
Drinking mulled wine and seeing the lights
G
You lit up london in my eyes
Am
I loved last december
F
Don't think that i don't remember it all know

G **Am**
Late nights and buses, laughing and running
F
Never making the last train in time
G **Am**
Kissing and fighting, till i would start crying
F
Cause you were so drunk out your mind

C
I met you there with a nervous smile
G
I left you here with nothing but
Am
Memories of december
F
Now it's all i remember yeah

C
Drinking mulled wine and seeing the lights
G
You lit up london in my eyes
Am
I loved last december
F
Don't think that i don't remember it all now

Am
Cause it's all i remember
F
But that was last december
C
And this is now
