

## The Offspring - Get It Right

```
Tom: Bb
                       For the beginning, just blast a low F chord and do some
pickscrape
 (Intro Riff, used at several places in the song)
Chords Definition:
               F(high) Eb C Db F A(high) A#(high)
       <-- Mute that chord
F(high)
I've been told to get what you want,
                                                                                     Eb
                                                                                                                                                                                                      F(high)
You just gotta give what you can.
F(high) Eb
But I know, that what I want
                                                                                                          Eb F(hiah)
It don't come as easy as that % \left( 1\right) =\left( 1\right) \left( 1\right) \left(
F(high)
                                                                                    Eb
Look out boy, tomorrow comes
                                                                                                                   Eb F(high)
And things will be better by then
F(high)
But I look out the window, look in the mirror
                                                             Eb F(high)
Same old me again
F(high) A#(high)
Still Can't get right X4
                                                                                                                                                                                                                  A(high) (
                                                                                             Db
And for all I know, I swear I never will
(Intro Riff)
F(high)
```

```
Do you think you'd sell your soul
Db
            Eb F(high)
To just have one thing turn out right
F(high)
                  Eb
For the thousandth time, your turn and find
           Eb
It just makes no difference to try
                  Eb
F(high)
Like Holden Caulfield I tell myself
               Eb
                        F(high)
There's got to be a better way
F(high)
               Eb
But I lay in bed, stare at the ceiling
       Eb
Db
              F(high)
Dream of brighter days
                A#(high) A(high) C
F(high)
Still Can't get it right X4
           Db
And for all I know, I swear I never will
Eb Db F
No way out, same old stuff always drags me down
     Db
Eb
No way out, never gonna get it right now
(Intro Riff)
F(high) Eb Db Eb F(high)
No way out, No way out F(high) Eb Db Eb F(high)
No way out, no way out
F(high)
                A#(high) A(high) C
Db Db Db
never never
Will
```
