One Direction - Infinity

Tom: E

```
    Verso 1:
E                                                    B
Down to earth, keep 'em falling when I know it hurts,
                       A
going faster than a million miles an hour,
                      Am
trying to catch my breath some way, somehow.
E                                            B
Down to earth, it's like I'm frozen, but the world still
turns,
                      A
stuck in motion, and the wheels keep spinning 'round,
              Am
moving in reverse with no way out.

Pré-Refão:
                        E
And now I'm one step closer to being
B
two steps far from you,
     A
And everybody wants you

Everybody wants you.

Refrão:
E                                         B
How many nights does it take to count the stars?
                                      A
That's the time it would take to fix my heart,

oh, baby, I was there for you.

All I ever wanted was the truth, yeah, yeah.
E                                           B
How many nights have you wished someone would stay?
                        A
lay awake only hoping they're okay.

I never counted all of mine,
                                       E
If I tried, I know it would feel like infinity.
       B         A
Infinity, infinity, yeah
Infinity.

Verso 2:
E                                          B
Eyes can't shine unless there's something burning bright
behind,
                     Gbm
```

```
Since you went away, there's nothing left in mine,
                     Am
I feel myself running out of time.
