

## **OneRepublic - All We Are**

```
Tom: G
                                                               We won't break we won't die, it's just a moment of change
                                                                                     D
                                                                         G
   (intro) Bm G D G
                                                               All we are, all we are, is everything that's right
                                                                          G
                                                                                        D
(verso 1)
                                                               All we need, all we need, a lover's alibi
I tried to paint you a picture, the colors were all wrong
                                                               (verso 2) (mesmos acordes do verso 1)
                                                               I walked a minute in your shoes, they never would have fit
Black and white didn't fit ya, and all along
                                                               I figured there's nothing to lose, i need to get
                                                               Some perspective on these words, before i write them down
You were shaded with patience, and strokes of everything
                                                               You're an island and my ship has run aground
That i need just to make it, but i can see that
                                                               (pré-refrão)
(pré-refrão)
                                                               (refrão)
Lord knows i failed you time and again
                                                               And every single day that i can breathe
But you and me are alright
                                                               You change my philosophy
(refrão)
           G
                        D
                                                               I'm never gonna let you pass me by
We won't say our goodbyes, you know it's better that way
                                                               (refrão 2x)
```

## **Acordes**
