Os Paralamas do Sucesso - Running On the Spot

```
Out the pastures we call society
                                 versão "Uns Dias-ao vivo"
                                                                You can't see further than the bottom of your glass
Intro:
                                                                Only you but easily shocked
[Intro:] G F Em Eb
                                                                You get all violent when the boat gets rocked
I was hoping we'd make real progress
                                                                We're just running on the spot
                    Eb
But it seems we have lost the power
                                                                We're just running on that
Any tiny step of advancement
                                                                Just like sheep little lambs into the slaughter
Is like a raindrop falling into the ocean
                                                                                       Eb
                                                                Don't fully grasp what exactly is wrong
We're running on the spot always have always will?
                                                                Truth is you never cared still
                                                                You get all violent when the boat gets rocked
We're just the next generation of the emotionally crippled
We're just running on the spot
                                                                Intelligence should be our first weapon
                                                                And stop reveling in rejection
Though we keep piling up the building blocks
                                                                And follow yourselves not some ageing drain brain
The structure never seems to get any higher
                                                                Whose quite content to go on feedind your garbage
Because we keep kicking out the foundations
And stand useless while our lives fall down
                                                                We're running on the spot always have always will?
I believe in life and I believe in love
                                                               We're just the next generation of the emotionally crippled
                                                           G F Eb
                                                                We're just running on the spot
But the world in wich I live in keeps trying to prove wrong
                                                                We're just running on that
                                                                On the spot
We're just running on the spot
                                                                We're just running on that
```
