Parachute - Laura Marano
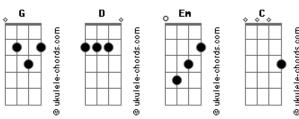

Tom: G
Intro: G (2x) D (2x) Em (2x) C (2x)

```
G              D
I remember life before
Em               C            G
Faraway dreams and locking doors
        D              Em       C
Then you came, then you came
G                  D
Afraid to fall, to be free
Em               C     G
Always my own worst enemy
         D          Em         C
Isn't what, what you see
Em              D
I took time to realize
      G              C        D
That I couldn't do it by myself, myself
```

```
            G                    C
There's no gravity when you're next to me
Em                        D
You always break my fall like a parachute
            G                      C
When you're holding me so weightless I barely breathe
Em                      D
You always break my fall, my fall
      G              C
Like a parachute
         Em       D
You're my parachute
```

```
G            D
With you it all begins
Em            C       G
Feeling okay in my own skin
         D          Em      C
So alive, I'm so alive
G                 D
I know this life isn't gonna be perfect
Em                C            G
```

```
The ups and downs are gonna be worth it
            D          C          D
As long as I'm, I'm with you
```

```
            G                 C
There's no gravity when you're next to me
Em                        D
You always break my fall like a parachute
            G                      C
When you're holding me so weightless I barely breathe
Em                      D
You always break my fall, my fall
```

```
You're my parachute
```

```
            Em              C
When I'm standing at the edge
                D
It's such a long way down
        Em          C
And I second-guess myself
                  D
You're there to catch me now
Em      C
Woah, woah
D
Woah, woah
```

```
I'll never touch the ground
```

```
            G                  C
There's no gravity when you're next to me
Em                  D
You always break my fall like a parachute
            G                      C
When you're holding me so weightless I barely breathe
Em                      D
You always break my fall, my fall
      G                C
Like a parachute
         Em       D
You're my parachute
```
