

## **Passenger - Staring At The Stars**

```
Tom: E
                                                                Remember when they were in reach
                                             C)
 (com acordes na forma de
                                                                And all the teachers used to teach
Capostraste na 4ª casa
Tobacco stains our yellow teeth
                                                                You can do anything if you put your mind to it
                                                                We put our minds to it all
And all our fingers and underneath
Our fingernails that clasp on sheets
                                                                But disappointment crashed the ball
And we try desperately to sleep
                                                                We could've done anything
Hearts are sad and eyes are tired
                                                                We just never quite knew it so
And all this red bull keeps us wired
                                                                  Tie your scarf on tight
It gives us wings
                                                                Its to be a cold night
It gives us rings around our eyes
                                                                  Tie your scarf on tight
                                                                Its to be a cold night
We put three sugars in our tea
Sit to watch day time t.v
                                                                  Tie your scarf on tight
And laugh at mums who don't know who the father is
                                                                Its to be a cold night
                                                                  Tie your scarf on tight
And all our girlfriends are long gone
We watch too much internet porn
                                                                Its to be a cold night
Who needs love when you've got silicone and strap ons
                                                                Repete
C Em C Em
                                                                Oh oh so tie your scarf on tight
                                                                Its to be a cold night
And beer bloats our spoilt guts
                                                                  Tie your scarf on tight
And shit jobs keep us in ruts
                                                                Its to be a cold night
And keep us eyeing up the what's and if's and buts and maybe's F
                                                                  Tie your scarf on tight
Falling over in the street
                                                                Its to be a cold night
                                                                                                 G
                                                                            C
                                                                  Tie your scarf on tight
Is just a part of every week
And we lie drunkenly just staring at the stars
                                                                Its to be a cold night
```
