Passengers - Sweet Louise

Tom: D

 (com acordes na forma de G)
Capostraste na 7ª casa
Intro: G C G C G C G

```
                              Am    G      C
I've only known her for a while
     D              G  C  G
She came as some surprise
                        Am     G     C
I see the sunshine when she smiles
               D        G     Bm
I feel the rainfall when she cries

              Am     Em
She hits me in the heart
     D        G      Am
She drops me to my knees
                     C            D
And I don't know where I'd be without you
         G    C    G
Sweet Louise

                      Am        G      C
Where she flies just like a bird
         D           G    C  G
And she floats just like a dream
                      Am     G     C
She's the sweetest song I've heard
            D        G    Bm
And the sweetest face I've seen

              Am     Em
She hits me in the heart
     D        G      Am
She drops me to my knees
                     C            D
I don't know where I'd be without you
```
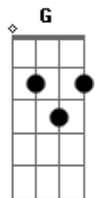

```
                 G     C     G
My Sweet Louise

             Bm
They say patience is a virtue
                  Am
And she'll wait, she won't desert you
             Em                 D
She's got hands that couldn't hurt you
          G    C  G
If they tried
                  Am
With all that happiness she has me
          C               D
But she loves and understands me
           Em
Right or wrong, I know
     D           G   C  G
She's always by my side
          Am            C    D
So if you please, put me at ease
             G  C  G
My sweet Louise

[Solo]  Am  C  D  G  C  G  Am  C  D  G

Bm                     Am     Em
And she hits me in the heart
             D          G      Am
Oh, and she drops me to my knees
                      C         Am
I don't know everything about you
                  G     C         Am
Never you give me no reason to doubt you
             G        C       D
And I don't wanna be without you
         G  C  G  C  G  C  G
Sweet Louise, yeah
```
