

## Paula Siqueira - Close By My Heart

```
Just in case you want to knock on it ${\rm Bm}$ {\rm A}$ {\rm G}$ There?s nothing to hold on
                                  tom:
              [Primeira Parte]
                                                                            I will drag no aching
                                                                            I?ll see you when I least expect to
Thank you for the days you took me out
                                                                            That?s kind of our thing
And listened to my ramblings
                                                                            ( Gbm A E B )
( Gbm A E Dbm )
And for when I thought you were getting bored
I would catch you smiling
                                                                            [Ponte]
[Pré-Refrão]
                                                                            We would never call us something
                                                                             Sorry if it scared you
                                                                            And I remember laying ?round and laughing
Wish you could stay a little longer
                                                                                              Dbm
                                                                            ?Bout the silliest stuff
But I know there?s no place in your heart right now
For this feeling growing stronger {\sf G} {\sf D} {\sf Em} {\sf D} {\sf A}
                                                                            And I remember turning ?round E B
                                                                            And catching your eyes on mine Gbm A
I?ll meet you somewhere along the way
                                                                            I would?ve ignored my blushing

E

Dbm
[Refrão]
                                                                            If I knew it?d be the last time
We were something good
                                                                            [Pré-Refrão]
And I?ll keep you in my memory Em D
Close by my heart
                                                                            Sorry if it scared you \bar{}
Just in case you want to knock on it $\mathsf{Bm}$ \mathsf{A} \mathsf{G}
                                                                            Wish you could stay a little longer
There?s nothing to hold on
                                                                            But I know there?s no place in your heart right now
                                                                            For this feeling growing stronger \begin{tabular}{c|c} \hline G & D & Em & D & A \end{tabular}
I will drag no aching
I?ll see you when I least expect to
                                                                            I?ll meet you somewhere along the way
That?s kind of our thing
                                                                            [Refrão]
[Segunda Parte]
                                                                            We were something good
Thank you for welcoming me
                                                                            And I?ll keep you in my memory \stackrel{\textstyle \mathsf{Em}}{}
\ensuremath{\mathsf{Em}} When all my fears would enter in
                                                                            Close by my heart
And for when I thought my tears would fall
                                                                            You would just distract me
                                                                            There?s nothing to hold on
[Pré-Refrão]
                                                                            I will drag no aching
                                                                            I?ll see you when I least expect to
Sorry if it scared you
                                                                            That?s kind of our thing
Wish you could stay a little longer
But I know there?s no place in your heart right now
                                                                            We were something good
For this feeling growing stronger \begin{tabular}{c|c} G & D & Em & D \end{tabular} A
                                                                            And I?ll keep you in my memory \stackrel{\scriptstyle \mathsf{Em}}{}
                                                                            Close by my heart _{\hbox{\scriptsize G}}
I?ll meet you somewhere along the way
                                                                            Just in case you want to knock on it $\mathsf{Bm}$ \mathsf{A} \mathsf{G}
[Refrão]
                                                                            There?s nothing to hold on
We were something good
                                                                            I will drag no aching
And I?ll keep you in my memory Em D
                                                                            I?ll see you when I least expect to
Close by my heart
                                                                            That?s kind of our thing
```
