

Peking Duk - Chemicals

tom:
 See you talking like that
 It's a problem I can't try to explain
 Driving away, see on my face I just wanna come back
 Even if I lie, I get so tired of getting a taste
 Trying to gauge, how long it takes till I'm running home fast
 Wherever you are, I've been waiting for a long time

And I'll try whatever you want
 I can't wait anymore
 I've been waiting for you all night
 But I can't get you to stay
 With night calls and chemicals, I'm lying awake
 I can't call you anymore, can't wash you away
 The light's off, forget it all, can't get you stay
 With night calls and chemicals
