

# Pepper - Ordinary Day Solo

Tom: **A**  
 by Jeff  
 No, this song is not on any album (or at least I don't think so) but rather it was a free download that came from pre-ordering  
 Standard tuning (EADGBe)

The part with the " x" is just some slow picking of muted strings

Tablature Legend

## Acordes

```
-----
h :: hammer-on
/ :: slide
:: pick note toward high-e string
x :: muted note
```

That's the gist of it, but the real deal has some staccato, lots of dynamics (changes in volume including crescendos and decrescendos and more!), overdrive, reverb, and other lovely additions.

And yes, I'm a novice tabber (and not the greatest guitar hobbyist either) so this is my first tab. I know it doesn't look perfect (especially rhythm-wise), but the notes sound spot-on and it's a slow solo so the rhythm is pretty easy to figure out. I used PowerTab to help me write this tab, but my actual PowerTab file has totally incorrect rhythm so that's why I didn't upload it.
