Peter Hammill - Nadir's Big Chance

Tom: D
Intro: A   G   D

```
        D                 G              A
I've been hanging around, waiting for my chance
G                      A          D
  to tell you what I think about the music that's gone down
      G              A       G                        A
to which you madly danced - frankly, you know that it stinks
D                                      A
I'm gonna scream, gonna shout, gonna play my guitar
           D    D  A    G   D            D  D
until your body's rigid and you see stars
A  G  D

   D                      G            A
Look at all the jerks in their tinsel glitter suits
G          A    D
  pansying around; look at all the nerks
           G        A      G                        A
in their leather platform boots,   making with the heavy
sound...
```

```
D                                      A
I'm gonna stamp on the stardust and scream till I'm ill
              D      D  A    G   D         A
if the guitar don't get ya, the drums will

{ C D C D   A C D C D   A C D C D   G A D F } x4        D   A
D                   G              A
Now's my big break - let me up on the stage
G                         A    D
I'll show you what it's all about; enough of the fake
G                        A    G
A
   bang your feet in a rage,     tear down the walls and let us
out!
D                               A
We're more than mere morons, perpetually conned
            D      D  A    G             D        x2
D   D   A   G
so come on everybody, smash the system with the song
                G     A    D
Smash the system with the song!
```
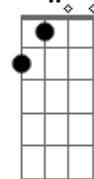

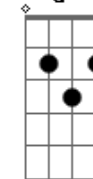

Acordes
