

# Phillip Phillips - Lead On

Tom: C

Tom: C

Intro: F G Am

I see you in my dreams

Seems like you never leave

You are the blur in my eyes

As I wake up through the night

Ten thousand hands can't hold

This heavy heart of stone

I feel it break like glass

Still I keep coming back

So pick me up

Then throw me down

Shine the light

Then turn it out

You make your way through the fire

I stand inside and I get burned

You make your love a liar

I'm hanging on to every word

I can't quit you

And I'm fine with being used

Lead on, lead on and I'll follow

Lead on, lead on

I'll follow wherever you go

Right down that rabbit hole

Then everything gets dark

And I feel pulled apart

Running through my blood

You are the rarest drug

With every word I breathe

I see the way you've changed me

Around then throw me down

Shine a light then turn it out

You make your way through the fire

I stand inside and I get burned

You make your love a liar

I'm hanging on to every word

I can't quit you

And I'm fine with being used

Lead on, lead on and I'll follow

Lead on, lead on

Paint the road to see the way

Should I go or should I stay

I'll come around again

I'll come around again

We never learn to let it go

Always feel it as you grow

It comes around again

It comes around again

Lead on, lead on and I'll follow

Lead on, lead on I'll follow

You into the night

Lets get lost until its light
