

# Phillip Phillips - Lead On

Tom: C  
Intro: F G Am

I see you in my dreams  
Seems like you never leave  
You are the blur in my eyes  
As I wake up through the night  
Ten thousand hands can't hold  
This heavy heart of stone  
I feel it break like glass  
Still I keep coming back  
So pick me up  
Then throw me down  
Shine the light  
Then turn it out

You make your way through the fire  
I stand inside and I get burned  
You make your love a liar  
I'm hanging on to every word  
I can't quit you  
And I'm fine with being used

Lead on, lead on and I'll follow  
Lead on, lead on

I'll follow wherever you go  
Right down that rabbit hole  
Then everything gets dark  
And I feel pulled apart

Running through my blood  
You are the rarest drug  
With every word I breathe  
I see the way you've changed me  
Around then throw me down  
Shine a light then turn it out  
You make your way through the fire  
I stand inside and I get burned  
You make your love a liar  
I'm hanging on to every word  
I can't quit you  
And I'm fine with being used  
Lead on, lead on and I'll follow  
Lead on, lead on

Paint the road to see the way  
Should I go or should I stay  
I'll come around again  
I'll come around again  
We never learn to let it go  
Always feel it as you grow  
It comes around again  
It comes around again

Lead on, lead on and I'll follow  
Lead on, lead on I'll follow  
You into the night  
Lets get lost until its light

## Acordes
