Intro: C G A F
                                                                 Like damn
                                                                 You could be the one that could mess me up
Remember that trip we took in Mexico?
                                                                 You could be the one that'll break me
Yeah, hanging with the boys and all your señoritas {\sf C} {\sf A} {\sf F}
                                                                 Damn
I never spoke up, yeah, I never said hello
C G A
                                                                 All them other girls said they had enough
But I keep on trying to find a way to meet ya
                                                                 You could be the one that'll take me
                                                                 I was solo, living YOLO
I was chillin', you were with him
                                                                 'Til you blew my mind
Hooked up by the fire
                                                                 Like damn
Now he's long gone
                                                                 You could be the one that could mess me up
I'm like, "So long"
                                                                 I can't let you
Now I got my chance
                                                                 Can't let you pass me by
Now I, now I got my chance
                                                                 Oh oh, oh oh, oh oh
                                                                 I can't let you pass me by

                                                                 Like damn
