

Radiohead - Follow Me Around

Tom: **C**

UNRELEASED

Tabbed by: Hugh Nettar

Of course, it is not exactly how Thom Yorke plays it, but rather my interpretation of it from watching the video. Thom's genius makes this piece fly despite using only two chords, **D** and **G**. They are basically as follows (PLEASE NOTE the dropped **D** tuning):
D major

D A D G B d
0-0-0----0
		0	
		0	
Intro:

Verse:

G major
D A D G B d
----0-0-0-0

picking a bit here and there.
But this should give you the rough idea. Not bad for my first tablature, huh? Anyway, here are the lyrics, also available from Injektilo at:

I see you in the dark
Falling down the fast lane
Calling out to me
Oh that's where I'll be
Crawling out to me
Crawling out to me

You follow me around
You follow me around
You follow me around
You follow me around

And I'm coming down
Maybe I'll take you for a walk
Then I can see you
I'm feeling it coming down

You follow me around
You follow me around
You follow me around
You follow me around
I feel it
I feel it

The **MPIE** video version has Thom basically playing around this,
