

Radiohead - Go to sleep

Tom: **C**

notes: there are actually 3 (or more) guitars at work in the main verse, but i'm just putting the two main riffs that i hear. the third guitar is basically just adding minor lead riffs based on the main chord progression, but i can't be bothered to try to differentiate between the different parts and tab them out. if someone is desperate to know each individual guitar part, make a request, i might give it a try. but for now, this'll be fine...
