(with wah)

[Chorus]

I can't hear all of the chords, but I recognise a few of them,
play these chords
and you'll get away with it. It sounds pretty RHCP anyway.

Strum each chord for one bar, strum on 16th notes.

Verse 3]
[Chorus 3]
[Outro/Solo]

This whole section has a lot of tremolo effects on it, if
you've got a delay
pedal just turn up the repeats a lot, I think it has a bit of
the 'phase'
effect as well, not too sure tho.

If you don't have any pedals you could get away with just
picking each note
a few extra times.

add wah pedal from here to the end of the song.
