

Rend Collective - Movements

```
Tom: E
                                                                [Verso 2]
                                                                I wanna float with you
 (com acordes na forma de D )
Capostraste na 2ª casa
                                                               D A
The currents driving me
[Verso 1]
                                                               But I'll paddle hard too
I wanna soar with you
                                                               When the waves and rapids overcome
Up on wings like eagles
                                                                I wanna stand firm
                                                                      D
But I'll crawl with you too
                                                               When my minds weak and my emotions squirm
When the dark and lonely questions come
                                                                I must stand true
I wanna stand true
                                                               Whatever hits I'll keep making movements to you
No matter what's new or comes through
                                                                [REFRÃO]
                                                                I'm running fast and free to you
I cant stand still
Whatever hits I'll keep making movements to you
                                                               Cos you are the movement and fight in me
                                                               I'm Running fast and free to you
I'm running fast and free to you
                                                               Cos you are my home
                 D
Cos you are the movement and fight in me
                                                               Where I wanna be
I'm Running fast and free to you
                                                               Come move in me
                                                               Where I wanna be
Cos you are my home
Where I wanna be
                                                               Come move in me
Come move in me
                                                                [PONTE]
Where I wanna be
                                                               Won't walk away, won't walk away (x3)
                                                                          Bm
Come move in me
                                                               Won't walk away, won't walk away
```
