Rise Against - The Violence

Tom: Eb

```
               Am
Dancing on the crumbling precipice
The rocks are coming loose just at the edge
                  F
Are we laughing? Are we crying?
                G
Are we drowning? Are we dead?
                              Am
Or is it all a dream?

Am
The bombs are getting closer everyday
'That can never happen here - we used to say
                 F
Have these wars come to our doorstep?
                 G
Has this moment finally come?
                           Am
Or is it all a dream?

                 F
Are we not good enough?
                G
Are we not brave enough?
         Am
Is the violence in our nature
          G
Just the image of our maker?

                 F
Are we not good enough?
                G
Are we not brave enough?
         Am
To become something greater
              G
Than the violence in our nature?
            F              G
Are we not good, good enough?
                        Am
Or is it all a dream?

        Am
To a predetermined fate are we condemned
Or maybe we're a book without an end
                 F
We're not stories, we're not actors
               G
We're awake and in control
                            Am
And this is not a dream

             Am
So can we break this mold
And set in motion something new
                  F
Forgetting what we know
           G
An evolution overdue

               F
Fight the current
Pull the ripcord
              G
Get away!

  F
```

```
Are we not good enough?
                    G
Are we not brave enough?
               Am
Is the violence in our nature
              G
Just the image of our maker?

                      F
Are we not good enough?
                   G
Are we not brave enough?
            Am
To become something greater
                  G
Than the violence in our nature?
                  F          G          Am
Are we not good, good enough?

G
Well trodden paths are all we take
We need a storm
                            Am
Let's pray for rain now
        C                       G
To wash these roads away

Let's get off track and wander far
                                          Am
Same roads lead to same destinations
             C                  G
Follow nothing but your heart

We're talking in our sleep
                                  Am
And sleeping through our lives
           C
We dream of the places
                       Am
Where we never die
                       C
We step from our shadows
        G         Am
And into the light

F
Are we not good enough?
                 G
Are we not brave enough?
            Am
Is the violence in our nature
              G
Just the image of our maker?

                      F
Are we not good enough?
                   G
Are we not brave enough?
            Am
To become something greater
                  G
Than the violence in our nature?

                  F              G
Are we not good enough?
                      F              G
Are we not brave enough?
                  F              G
Are we not good, good enough?
                              Am
Or was it all a dream?
```
