

Rod Stewart - I don't want to talk about it

```
Intro: Bm7 E A A7
                                                               The stars in the sky don't mean nothing
                                                                              A A7
                                                               To you they're a mirror
Bm7
I can tell by your eyes
That you've probably been crying forever
                                                               I don't wanna
                                                                                  talk about it,
                                                                                                     how you broke my heart
And the stars in the sky don't mean nothing
                                                               If I stay here just a little bit longer
To you they're a mirror
                                                               If I stay here won't you listen
                                                  Gbm
I don't wanna
                   talk about it,
                                    how you broke my heart
                                                               To my heart,
                                                                                   oh my heart
If I stay here just a little bit longer
                                                               ( Cm F Bb )
( Bb Fm Bb Ab )
If I stay here won't you listen
To my heart,
                                                                                  talk about it,
                                                                                                   how you broke my heart
                                                               If I stay here just a little bit longer
If I stand all alone
                                                               If I stay here won't you listen
Will the shadows hide the colours of my heart
(Blue for the tears, black for the night's fears)
                                                                                   oh my heart
                                                               To my heart,
```
