

## Sabrina Carpenter - Alien (feat. Jonas Blue)

```
Getting in my space, livin' in my place
apotraste na 6º casa [Intro] D
                                                                When did these games begin?
                                                                I'm overthinking my thoughts again
This feeling's so alien
                                                                No, we don't break, but we're bound to bend
Need to know if you're just a friend
                                                                Getting in my space, livin' in my place
Are you a secret I'm holdin' in?
So leave it on my brain if you feel the same
                                                                Ooh, let me discover all of your colors
Lie but I notice it
                                                                If you love me let me know
Don't know the rules but I got to win
                                                                No, no, let me discover all of your colors
The paranoia is sinkin' in
                                                                If you love me let me know
So leave it on my brain if you feel the same
                                                                Don't let me leave when I'm standing at your door
Ooh, let me discover all of your colors
                                                                (Baby no, don't let me)
If you love me let me know
                                                                Don't make me stop when you're really wanting more
No, no, let me discover all of your colors
                                                                (Cause I know you're wanting more)
If you love me let me know
                                                                If you show me what you were thinking of
                                                                Let me get inside your mind
Don't let me leave when I'm standing at your door
                                                                If you show me love it'll be enough
Don't make me stop when you're really wanting more
(When you're really wanting more)
                                                                It'll be a better night
If you show me what you were thinking of
                                                                If you love me let me know
Let me get inside your mind
                                                                If you love me let me know
If you show me love it'll be enough
                                                                If you love me let me know
It'll be a better night
                                                                It'll be a better night (be a better night)
If you love me let me know
                                                                If you love me let me know
                                                                If you love me let me know
If you love me let me know
If you love me let me know
                                                                If you love me let me know
It'll be a better night
                                                                It'll be a better night (no, no, no)
If you love me let me know
                                                                If you love me let me know
If you love me let me know
                                                                If you love me let me know
If you love me let me know
                                                                If you love me let me know
It'll be a better night
                                                                It'll be a better night
                                                                If you love me let me know
Alienated them
                                                                If you love me let me know
What about when our love began?
                                                                If you love me let me know
Emotions are moving in
                                                                It'll be a better night
                                                                A better night, yeah
```
