

Sabrina Carpenter - Right Now

```
Tom: C
  Into: C Am F C
We'll never be as young as we are right now
                    Am
We'll never see the world like we do right now
So take in what's around you, put your camera down
Take a shot, give it all you got
I have a way of getting stuck on yesterday
I tend to miss the little things that come my way
                 Am
Always looking forward, always looking back
They seem so near, but they're not here
Pre-chorus:
               Am
'Cuz time moves on so quickly
Without or with me
I've got to take a breath
Chorus:
And slow down, slow down, my mind is racing
Catch up, catch up, I've gotta pace myself
I'm always wondering, but I don't need to go right now
Let go, let go, we hold our fears too tight
Begin, begin, to live your life
The present is our future past, we've gotta make this moment
last right now
Verse 2:
```

Have you ever noticed how your heartbeat feels When your love is so exciting, 'cuz it's getting real Have you stopped to listen to what's in your soul That's your intuition, and it always knows Pre-chorus: Time moves on so quickly Without or with me I've got to take a breath Chorus: And slow down, slow down, my mind is racing Catch up, catch up, I've gotta pace myself I'm always wondering, but I don't need to go right now Let go, let go, we hold our fears too tight Begin, begin, to live your life The present is our future past, we've gotta make this moment last right now [Bridge]: Right now, right now Enjoy the ride, the ride that you're on Right now, right now Let go, let go, we hold our fears too tight Begin, begin, to live your life The present is our future past, we've gotta make this moment

last right now
