Sabrina Claudio - Confidently Lost

```
Nothing seems to phase me
                                                                             Bhm
I'm alone but not lonely
                                                                      Cause I
Comfortably indulging
                                                                      I am confidently lost
And trying to get to know me
                                                                      I don't need you to find \ensuremath{\mathsf{me}}
I'm just a outline of what I used to be
                                                                      Cause I know how it is
Constantly evolving
Steadily revolving
                                                                      Anything
                                                                      Anything
                                                                      Anything
I am confidently lost
                                                                      Anything
I don't need you to find me
You don't define me
                                                                      Thinking about where I've gone
                                                                             Bbm
I am confidently lost
                                                                      Where I'm going
                                                                      And I wouldn't change it for the world Thinking about where I'm from
I don't need you to find me
Cause I know how it is
                                                                      If I belong there
Anything
Anything
                                                                      But I wouldn't change it for anything
                                                                      (I wouldn't change it for anything)
Made up of hope and meditation
                                                                      Anything
                    Gm Am
Love, imagination water my creations
Baby it's amazing
                                                                      Anything
                                                                      Anything
```

All the days I'm facing

Acordes
