There is nothing wrong to break up today
Hid your love and felt yourself
                                                                 Please check this sound

You write it, you sing it, you hear it, you love it
Look yourself around
                                                                 Please check this sound
Make your peace and give yourself a sign
To see the world and search the one
                                                                 Look yourself around
That fills my mind
And there is love to find
                                                                 Check this sound
To believe in something to pride
I leave and live to find it. I tried
                                                                 Look yourself around
But I see
We are love sicks, love weak, love blinds
We need to cure ourselves
We need to walk some steps behind
                                                                 So bad so right
To see we're wasting much precious time
                                                                 Tell me how to shine

Baby I know
```

```
To make our peace with ourselves
That's all right. It?s fine to be free
But there is a huge mystery for me
Hid your love and felt yourself
If you gave me no love, no light
Cos you gave me no love to fight
You write it, you sing it, you hear it, you love it
A song can be heard by both sides
You write it, you sing it, you hear it, you love it
Make your peace and give yourself a sign
You write it, you sing it, you hear it, you love it
A song can be heard by both sides
You write it, you sing it, you hear it, you love it
Make your peace and give yourself a sign
Hid your love and felt yourself
If you gave me no love, no light
