

Sara Bareilles - Basket Case

```
And I'm just a track you lay
                         tom:
                                                                            Bm7
                                                        So I'll stay right here underneath you
Intro: A G2 D A G2 D
                                                        I'm just a basket case and that's what we do
[Primeira Parte]
                                                        [Refrão]
             G2
I don't want to talk about it to you
                                                                           G2
    Α
                                                        You're begging for the truth
I'm not an open book
                                                        So I'm saying it to you
  G2
That you can rifle through
                                                        I've been saving your place
The cold hard truth
                                                        And what good does it do
        Bm7
                                                                  D A G2
That you'll see right to
                                                        Now I'm just a basket case
      D
I'm just a basket case without you
                                                        [Ponte]
He's not a magic man or a perfect fit
                                                                    D
                                                        Won't somebody come on in and tug at my seams
                        G2
But had a steady hand and I got used to it
                   Bm7 G2 Em7
                                                        Oh send your armies in of robbers and thieves
And a glass cage heart and invited me in
                                                           Bm G2
                                                        To steal the state I'm in
               D
                     Α
And now I'm just a basket case without him
                                                           D G2
                                                        I don't want it anymore
[Refrão]
                                                        ( A Bm7 A7 )
                                                        [Refrão Final]
You're begging for the truth
               D G A
So I'm saying it to you
                                                        You're begging for the truth
                                                                         D G A
                                                        So I'm saying it to you
I've been saving your place
      Gm
And what good does it do
                                                        I've been saving your place
          D
                                                               Gm
                                                        And what good does it do
Now I'm just a basket case
            D
                                                                    D
Now I'm just a basket case
                                                        Now I'm just a basket case
                                                                    D
[Segunda Parte]
                                                        Now I'm just a basket case
                                                                  D A G2
                                                        Now I'm just a basket case
                       G2
I don't say much and it'll stay that way
                                                                     D
                                                        Now I'm just a basket case
You got a steel train touch
            G2
