

## Sean Curran - Led Me To You

```
How Your love would never let go
                                                                 All the stories are true
                                [Intro] Am C F C
                                                                  I'm ok to be right where my feet are
[Primeira Parte]
                                                                 I'm learning that's where You are
 I don't like pain when I'm in it
                                                                 Take me where You want to
 I'd rather just skip to when it's finished
                                                                 [Pré-Refrão]
 But that's not the way it works
                                                                                   C
                                                                 But what scared me then doesn't scare me now
 I know You don't plan without a purpose
                                                                 Am C F C
Things with You tend to work out
 But the journey makes me nervous
'Cause sometimes the journey hurts
                                                                 I've been up on the mountain
[Pré-Refrão]
                                                                 Down in the pit
But what scared me then doesn't scare me now
                                                                 Everywhere in between
Things with You tend to work out
                                                                 I have lived on the highs
[Refrão]
                                                                 Cried through the lows
                                                                 Of just about everything
I've been up on the mountain
                                                                     Am
                                                                 But I'd go back to where I started
Down in the pit
                                                                 Go through what I went through
Everywhere in between
                                                                 I'd take all of the wins and all of the losses too
I have lived on the highs
                                                                  'Cause they led me to You
Cried through the lows
                                                                 Turnaround
Of just about everything
                                                                 Led me to You
But I'd go back to where I started
                                                                 Led me to You
Go through what I went through
                                                                 [Ponte]
I'd take all of the wins and all of the losses too
 'Cause they led me to You
                                                                  And now that You found me
                                                                 This is where I'll stay
Turnaround
                                                                 Covered up by Your love
They led me to You
They led me to You
                                                                 Covered up by that tidal wave
'Cause they led me to You
                                                                 [Final]
[Segunda Parte]
                                                                    'Cause they led me to You
I grew up learning about the \ensuremath{\mathsf{sparrow}}
                                                                  'Cause they led me to You
                                                                     Cause they led me to You
```
