

Sean Rowe - Long Way Home

```
tom:
Intro: G C D
                                                         Em D Em G
It?s a long way home
He couldn?t see too well
His left eye was shot out in the war
And the other one was getting
So tired of watching
     All of the time % \left( \frac{1}{2}\right) =\left( \frac{1}{2}\right) \left( \frac{1}{2}
It?s hard enough keep awake and alive
On this cold day
As far as he knows
It?s gonna take four days
                     D
For the man to catch up with the mile
                         D
And there?s nothing that
Could ever be smiling
                                                            Bm
Quite like death at the door
He never thought that he would be poor
                                                           G
Like that again
      Oooh
Em
He had a day dream
And a real need for a cigarette
          0ooh
The birds are falling
```

```
And it will dark soon
    C
So he told his boots... to carry on
(GCDEmG)
    G
On a granite stone
He didn?t sleep too well
He had her name at the edge
 Em
Of his tongue
    D
He made love to this memory
 Em
It stung him in the dark
Morning came and it ate his heart
And the sun shot holes in his mind
Oh but the thunder
Of the river behind him
     В
It brought him up to his knees
And he prayed hard enough to say please
    G
Against his odds
Am D
Oooh
He had a day dream
And a real need for a cigarette
The moon is calling
And it will be dark soon
So he told his boots... To carry on
```
