KILLER GUITAR SOLO THAT I COULD ACTUALLY FIGURE OUT!

Rest of GTR 1's solo

that sepultura usually tunes their whole guitar down instead of
just the bottom string. in drop **D** itsjust easier to play the power chords and it helps you avoid tuning the whole freakin guitar every song.

in this part of the solo the guitars are doubled. I thought id never figure this out until I got winamp.

easy.
GTR 2

ITs done. I feel like a genious. I'm 13 and I figured out a solo with a broken string.

Here Ive put both GTR's into one. If you (like me) have a hard time playing this way, than just play guitar ones part and it sounds fine.
