

Serj Tankian - Butterfly

Tom: G
Intro: Em G
Spare me the night
Trampled upon by submission
Amassed within one's own inhibition
Where the only prohibition is love
Spare me the night
Trampled upon by submission
Amassed within one's own inhibition
Where the only prohibition is love
Love
(Em G Am)
Children outcry, "grandfather sky"
Rivers surviving through her eye
We certified, how you falsified
The beauty of a moth turned butterfly, butterfly
Spare me the night
Trampled upon by submission
Amassed within one's own inhibition
Where the only prohibition is love
We are being sacrificed by our own suspicions
We are being sodomized by repetitions
Oceans calcified, egos gratified

I won't be crucified nor terrified, i'm not terrified
Before we say goodbye, no need to falsify
The beauty of a moth turned butterfly, butterfly
Spare me the night
Trampled upon by submission
Amassed within one's own inhibition
Where the only prohibition is love
We are being sacrificed by our own suspicions
We are being sodomized by repetitions
We are being sacrificed by our own suspicions
We are being sodomized by repetitions
(Em G Em C D)
A dark gray matter of fact sky
Nannies our nights with our half sister moon
Why can't we switch automatically
To eco-centric persuasions
Why can't we ditch autocracy
For eco-centric persuasions now
We are being sacrificed by our own suspicions
We are being sodomized by repetitions
We are being sacrificed by our own suspicions
We are being sodomized by repetitions

Acordes
